

Positive comments	Negative comments	Future usage
Special feature of the Glebe. So many adults, children and dogs use them. Please don't remove.	Don't hand over to the sports club. The Council needs to manage them.	To be used for more car parking space – needed at the weekends.
All my children use them- they need to stay	The Glebe originally was intended for everyone to use not just sport. There should be some other areas left for other purposes, whether it be for dog walkers or people who want to relax in the meadows.	Make the area fit for purpose and fence off so dogs can't use it.
All ages of children use them- they need to stay and be maintained.	Not fit for purpose as they have not been maintained.	Second field should be used as an open space for dog walkers and relaxation, as it was intended many years ago.
Good area to chill and relax	The potholes need filling in.	Could be used as a space for small children
My boys used when they were younger- keep them	My children used to enjoy the humps, but don't use them anymore, due to the bad mud after wet weather and the amount of excrement that I end up cleaning from their wheels and brakes. This is a shame, as I know they would, and indeed have said they would use again if it was back to a clean state. I am pleased you are considering the refurbishment of this facility.	Have them cleared of weeds and brambles and reshaped for the younger generation to use.
Field sports are not for everyone. Resident asked if there were any young riders who would want to help to revive them.	I am not for them as it would in my option be a waste of the precept money.	Turn it into just grass and a few trees along the hedge line and add some benches for the community to use as an open space.

If they were in better condition they would be used more.		Leave as a green area as Mersea is getting so built up
It should be a facility for all people of Mersea not just sport.		Flatten them get rid of football pitches and make way for a new rugby club house and parking with access via Dawes Lane.
Kids love them but they require maintenance.		Lets join together as a community and support the funding to revive them so they are fit for purpose.
I don't think they are necessary at the Glebe.		Need to be reshaped into jumps instead of mounds of dirt with rows of jumps for each level of rider from novice to expert. Each row should have a sign indicating the levels. This would bring more people back to Mersea which is good for shops.
		Flatten the humps and create a skate park for this side of Mersea.
		These are worthy of maintenance. I go to this weekly with my son and there are always other boys and girls playing and using them. This is a valuable feature to restore and maintain going forward.
		Regarding the bike if they are not used and the fencing is in a poor state of repair, then yes removal is a better option.
		I would like the provision of an outdoor gym, whereby every person could exercise freely, whenever possible. It would be a great asset to our community & would encourage healthy living. There are many good examples in London where space is limited. In many countries I have visited, they are included in the planning process.
